HeyPC voice commands

Your AI is called Jarvis until you rename it. Say these in your own words. Say "I meant Claude" to fix a misheard name. Change the wake word, voice and Start work list in Settings (right-click the ring icon).

Getting started

"Hey Jarvis"	Wakes it. It greets you, then listens.
"Hey Jarvis, open Chrome"	Say it in one breath to skip the greeting.
Tap or hold Right Alt	Same as the wake word, without speaking it.
Hold Right Ctrl and talk	Types your words wherever the cursor is.
Keep talking	After each command it keeps listening, so no wake word is needed.
"Thank you" or "That's all"	Ends the conversation.
"Jarvis stop"	Stops at once, even mid-reply or mid-dictation.
The small icon above the taskbar	Blue bars: listening. Amber spinner: working. Green wave: speaking.

Apps and windows

"Open Claude"	Shows the app, even if minimized, or launches it
"Close Spotify"	Closes the app; it can still ask to save
"Minimize Chrome" / "Maximize Cursor"	Resizes that app
"Minimize everything"	Shows the desktop
"Snap left" / "Put Chrome on the right"	Moves a window to one side
"Do that again"	Repeats your last command
"I meant Claude"	Corrects a misheard name and remembers it

Typing

"Type" (pause, then speak)	Types what you say next
"Type hello there"	Types those words straight away
"Send it" / "Enter"	Presses Enter
"...and send it" at the end	Types, then sends
"Remove all text"	Clears the box
"Remove the last word" / "last three words"	Deletes those words
"Remove the last sentence"	Deletes the last sentence
"Remove the word actually"	Deletes that word
"Undo"	Takes back the last action
"New line" / "Scratch that"	While dictating: line break / delete that bit

Web and browser

"Search for best laptops"	Google search
"Search YouTube for lo-fi"	Searches that site
"Go to the Gmail tab"	Jumps to a tab by name
"Close the Gmail tab"	Closes it by name
"New tab" / "Next tab" / "Close this tab"	Tab controls
"Go back" / "Refresh" / "Scroll down"	Page controls
"Click sign in"	Clicks an item by its name
"Open the third result"	Opens a result or email by number

ChatGPT and Claude

"Ask Claude what is an SIP"	Asks, then reads the start of the reply
"Ask ChatGPT ..."	Same, in ChatGPT
"New chat" / "New chat in ChatGPT"	Starts a fresh chat
"Summarize the response"	Reads a short summary aloud

Work

"Start work"	Opens what you chose during setup
"Git status in backend"	Runs a listed command, reads the result
"Run frontend"	Starts it in a terminal tab
"Start 3 Claude agents"	Opens that many terminals (up to 8)

Reminders and timers

"Remind me in 20 minutes to call Rahul"	Also "at 5 PM" or "tomorrow at 9"
"Set a timer for 10 minutes"	Chimes and speaks when done
"How much time is left?"	Reads what's coming up
"Cancel the timer" / "Cancel all reminders"	Removes them

PC controls

"Lock my PC"	Locks straight away
"Shut down" / "Restart"	Asks for a spoken yes first
"What's my battery?"	Reads the percentage
"Set brightness to 40" / "Volume up"	Screen and sound
"Turn off Wi-Fi" / "Turn on Bluetooth"	Switches them
"Take a screenshot"	Opens the snipping tool

Files and tools

"Find the invoice PDF"	Shows the newest match in its folder
"Open the budget file"	Opens it; programs are never launched
"Open my latest download"	Also "last screenshot"
"Open the downloads folder"	Opens a folder
"Rename this to Final Report"	Renames the selected file
"What's 18 percent of 2500?"	Calculator
"Paste the second last thing I copied"	Clipboard history

Messages, meetings and music

"Message Rahul on WhatsApp saying hi"	Drafts it; sends after a spoken yes
"Reply saying thanks" / "Archive this"	Works on the open email
"Schedule a meeting tomorrow at 3 PM"	Opens a filled-in calendar event
"Join the meeting"	Uses a link you copied or a Join button
"Play Coldplay on Spotify"	Also YouTube
"Pause" / "Next song"	Media controls
